英文创作摘要(创作之名称:)

DISPOSABLE DIAPER

In a disposable diaper (1), a pair of male surface fastener tapes (50) extends laterally in opposite directions from a rear flap (20) of a diaper body (1), each having a multiplicity of male engaging elements (52) on a substrate sheet (51). A part of outer surface of a front flap (10) of the diaper body (1) and/or a covering sheet (60) extending in a longitudinal direction from a front waist (12) of said front flap (10) is a non-woven cloth serving as a female surface fastener tape. In use, the covering sheet (60) is folded over the front part (10) so as to brought the non-woven cloth into engagement with the male engaging elements (52) of the male surface fastener tapes (50).
